SS3.3       Interfaced Fire or Smoke Doors (electromagnetic doors holders)         SS4       Emergency lighting systems         SS5       Escape route pressurisation system         SS6       Riser main for use by fire services         SS7       Automatic back-flow preventer connected to a potable water supply         SS8       Lifts, escalators, travellators or other similar systems for moving people or goods within buildings         SS9       Mechanical ventilation or air conditioning systems         SS10       Building maintenance units for providing access to the exterior and interior walls of buildings         SS11       Laboratory fume cupboards         SS12       Audio Loops or other assistive listening systems	
SS4       Emergency lighting systems         SS5       Escape route pressurisation system         SS6       Riser main for use by fire services         SS7       Automatic back-flow preventer connected to a potable water supply         SS8       Lifts, escalators, travellators or other similar systems for moving people or goods within buildings         SS9       Mechanical ventilation or air conditioning systems         SS10       Building maintenance units for providing access to the exterior and interior walls of buildings         SS11       Laboratory fume cupboards         SS12       Audio Loops or other assistive listening systems	
SS5         Escape route pressurisation system           SS6         Riser main for use by fire services           SS7         Automatic back-flow preventer connected to a potable water supply           SS8         Lifts, escalators, travellators or other similar systems for moving people or goods within buildings           SS9         Mechanical ventilation or air conditioning systems           SS10         Building maintenance units for providing access to the exterior and interior walls of buildings           SS11         Laboratory fume cupboards           SS12         Audio Loops or other assistive listening systems	
SS6         Riser main for use by fire services           SS7         Automatic back-flow preventer connected to a potable water supply           SS8         Lifts, escalators, travellators or other similar systems for moving people or goods within buildings           SS9         Mechanical ventilation or air conditioning systems           SS10         Building maintenance units for providing access to the exterior and interior walls of buildings           SS11         Laboratory fume cupboards           SS12         Audio Loops or other assistive listening systems	
SS7         Automatic back-flow preventer connected to a potable water supply           SS8         Lifts, escalators, travellators or other similar systems for moving people or goods within buildings           SS9         Mechanical ventilation or air conditioning systems           SS10         Building maintenance units for providing access to the exterior and interior walls of buildings           SS11         Laboratory fume cupboards           SS12         Audio Loops or other assistive listening systems	
SS8       Lifts, escalators, travellators or other similar systems for moving people or goods within buildings         SS9       Mechanical ventilation or air conditioning systems         SS10       Building maintenance units for providing access to the exterior and interior walls of buildings         SS11       Laboratory fume cupboards         SS12       Audio Loops or other assistive listening systems	
goods within buildings         SS9       Mechanical ventilation or air conditioning systems         SS10       Building maintenance units for providing access to the exterior and interior walls of buildings         SS11       Laboratory fume cupboards         SS12       Audio Loops or other assistive listening systems	SS7
SS9         Mechanical ventilation or air conditioning systems           SS10         Building maintenance units for providing access to the exterior and interior walls of buildings           SS11         Laboratory fume cupboards           SS12         Audio Loops or other assistive listening systems	SS8
SS10         Building maintenance units for providing access to the exterior and interior walls of buildings           SS11         Laboratory fume cupboards           SS12         Audio Loops or other assistive listening systems	
walls of buildings       SS11     Laboratory fume cupboards       SS12     Audio Loops or other assistive listening systems	
SS11         Laboratory fume cupboards           SS12         Audio Loops or other assistive listening systems	SS1
SS12 Audio Loops or other assistive listening systems	
	SS1
	SS1
SS13.1 Smoke control systems – Mechanical Smoke Control	
SS13.2 Smoke control systems – Natural Smoke Control	SS13
SS13.3 Smoke control systems – Smoke Curtains	
SS14.1 Emergency power systems	
SS14.2 Signs relating to, a system or feature specified in any of clauses1 to 13	
SS15(a) Systems for communicating spoken information intended to facilitate evacuati	
SS15(b) Final exits (as defined by clause A2 of the building code)	
SS15(c) Fire Separations (as defined by clause A2 of the building code)	SS15
SS15(d) Signs for communicating information intended to facilitate evacuation	
SS15(e) Smoke Separations (as defined by clause A2 of the building code)	
SS16 Cable Cars	SS1

\***SS2.1:** Example: (Small simple manual systems), such as type B, Type 1 manual and Type 2 systems, and conventional Type 3 fire alarms of 4 zones or less. Systems which are not interfaced with other building safety systems or specified systems. Systems not directly connected to the FENZ watch room. These are low risk systems which do not require special tools or equipment or experience to inspect, maintain or report on.

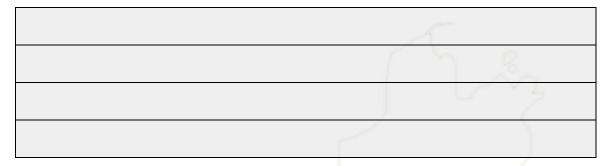

\*\***SS2.2**: Example: (More complex systems), All systems larger than 4 zones. Larger Type 3 systems, all Type 4 and analogue systems where specialist equipment and knowledge is required to both interrogate and programme systems etc.

\*\*\***SS2.3:** Example: (Other specialist Systems), CO, ammonia, methane, man-trapped alarms, and other such specialist systems. Provide a minimum SS2/1 level of level of attainment and evidence of specific experience of systems proposed to be maintained. NOTE – This IQP Accreditation will be suffixed with the specific system. E.g., SS 2/3 (Siemens CO gas detection system)

#### **Section B:** Qualifications & Experience (Please refer to the First Schedule Requirements)

#### Qualifications

• List Current Specified Systems (if any) that you are approved for by the South Island IQP Register and the status of those systems e.g. Inspection only, Maintenance Inspection and Reporting.

• Please list below the qualifications and experience you hold that is applicable to **each** specified system or feature applied for. It is important to note that all applicants are assessed as to their competence in respect of each Specified System applied for.

List Qualifications that you hold in respect of each specified system applied for.

Qualifications	Date Qualification Awarded	Discipline	Education Provider	Country	Year
e.g. Firetech Level 4	In years	As it relates to the system applied for	University/ Polytechnic etc	2	
/			6		

#### Professional Memberships/Registration/Licenses

• Please list any professional or licenses that you currently hold or have previously held. Certified copies of your membership/registration/license certificates must be provided with your application (please attach).

Institution/ Organisation	Class	Still current Y/N	Membership/Registrati on Number	Year Gained/Joined	Expiry Date

#### Work History Summary

Provide details of recent work history including dates of employment.

Name of Organisation	Position Title	Date of Employment	Key Responsibilities, Activities Undertaken
			The o
		ſ	
			/

Section C: Information used to verify compliance with Specified Systems.

• Identify the standards and or inspection procedures that you intend to use for each specified system that you have applied for. NOTE: Refer to first schedule "Guidelines for minimum qualification and experience required for acceptance of independent qualified person status."

Specified System	Relevant Standard/s	Inspection Sheet
	<u></u>	
62		

Attach evidence that you have access to each of the standards identified above. A photo copy of the front cover will suffice. Also attach copies of inspection/check sheets that you intend to use.

#### **IQP** assessment information

Demonstrate your understanding of the Building Act & Building Regulations as they relate to compliance schedules, Building Warrants of Fitness and IQP duties.

# When answering these questions refer to the **Building Act 2004 sections** <u>100-112</u>. <u>http://legislation.govt.nz/act/public/2004/0072/latest/DLM306036.html</u> and the Compliance schedule handbook available here <u>https://www.building.govt.nz/building-code-compliance/building-code-and-handbooks/compliance-schedule-handbook/</u>

IQP ASSESSMENT INFORMATION         Please complete the statements to show support of your competence level in the space below or attached copies.         1.       Building Warrant of fitness (BWOF)         Please describe your understanding of the building warrant of fitness and its purpose.         Hint – refer to Building act 2004 – section 108 and Ministry of Business, innovation & Employment - Compliance Schedule Handbook.

#### **Section D:** Supporting Statements:

- Attach supporting technical references from individual, professional/technical institutes (a minimum of one written reference is required for **each systems or feature** applied for).
- Referees should be qualified in the discipline for which they are providing the reference. Referees may be contacted during the processing of the application.

#### **Referees:**

Name two referees who are familiar with your activities and can provide comments as to whether you demonstrate competence in elements of your relevant field. Referees must be independent. I.e. not personally related to you and not expected to gain materially if your assessment is successful. One of your referees may be from your organisation.

#### Ideally one of your referees could be an IQP in the relevant field

#### Section E: Insurance

Public Liability or Professional Indemnity Insurance held relative to the role of an Independent Qualified Person. **Please provide a copy of the certificate of cover.** 

Type of Cover	Amount	Insurer	Exclusions
5			

#### QUALITY ASSURANCE

Are you/your organisation accredited in a recognised quality standard e.g. ISO/IANZ. If so please provide a description and a copy.	Yes	No
Do you or your company use check/prompt sheets for each type of inspection for which you have applied for. If so please attach those that apply to your current application.	Yes	No
Is any measuring equipment you use regularly calibrated? If so please identify the equipment and the process of how it is calibrated.	Yes	No

#### Section F: Statement about Application

I am applying for approval to be on the South Island IQP register.

I acknowledge that the South Island IQP registration panel may cancel my approval at any time subject to their disciplinary procedures.

I acknowledge that if my application is accepted my contact details will be on the IQP register which is available to the public.

I acknowledge that I will manage any potential conflict of interest.

If you intend supervising a person who is not a suitably registered IQP, please provide the following information:-

• Records of how this supervision is achieved.

I certify that all information I have provided in this application is true and accurate.

Signature: ..... Date: .....

Send your completed application to:-

iqpenquiry@timdc.govt.nz

NB: E-mail attachments are limited to 15MB, please contact the secretary for instructions for a large file transfer system.

Fees and Chargers for IQP Processing all inclusive of GST	
Application – Individual (one system only)	\$322.00
Per each additional system	\$23.00
Annual Renewals	\$138.00

Please note: Fees must be paid before an application can be processed and passed onto the panel for consideration. For payment options please see page 12
